

**Junior National Light or Heavy – Raced by Jake Ober. This is a great competitive Kart for someone just starting out. Omega frame is now getting a bit old but the motor is very quick with a proven track record within the TKC. Motor has had limited use since its last rebuild by Kip Foster. There are many parts and bits to help you get set up and go racing.**

- Has rebuilt Kart Force Motor (no clutch)
- Alfano Pro computer.
- Trolley, spares and tools. Big and small fuel tank.
- Comes with written log book and set ups for 5 WA tracks.
- Can assist with set up and provide as much lead as required to make weight.

**For any dad's out there thinking about getting their son into the game, this is a good starting point and I am happy to help you get started. I have had a ball with my son but they do grow up.**

**Good buy at \$2,000 ono.**

**I would rather see another young kid racing but will sell the motor separate if the price is right.**
