

Subject: QUERY REGARDING RACE RESULTS TO MYLAPS

Hi All

This weekend have had a number of queries regarding loading the race meeting results to MYLAPS.

This can't be done through the AKA Race Management System. The reason is that our system does not run off Orbits (which is the AMB system).

I have a small message from Warren Southwell listed below so you know what is happening with the timing results side of the system.

CM:S Results is an AKA web page that is currently being tested. It has similar pages to MyLaps and more. Race data will be available once the normal Data Synchronisation upload is done, and all past meetings are also available. The optional ability to upload after each race is being tested at the NSW Closed Titles this weekend. An announcement of the URL will be made as soon as the web page is made public. At this time, everyone will be able to browser all past and future CM:S race meetings, timed and untimed.

Regards

Michelle Lino
